Student Evaluation of Teaching (SET) for Jordan Schwartz

Summer Session I 2026 DSC 40AR - Theor Fndtns of Data Sci I (Schwartz, Jordan Justine)
Section 276869 [A00]

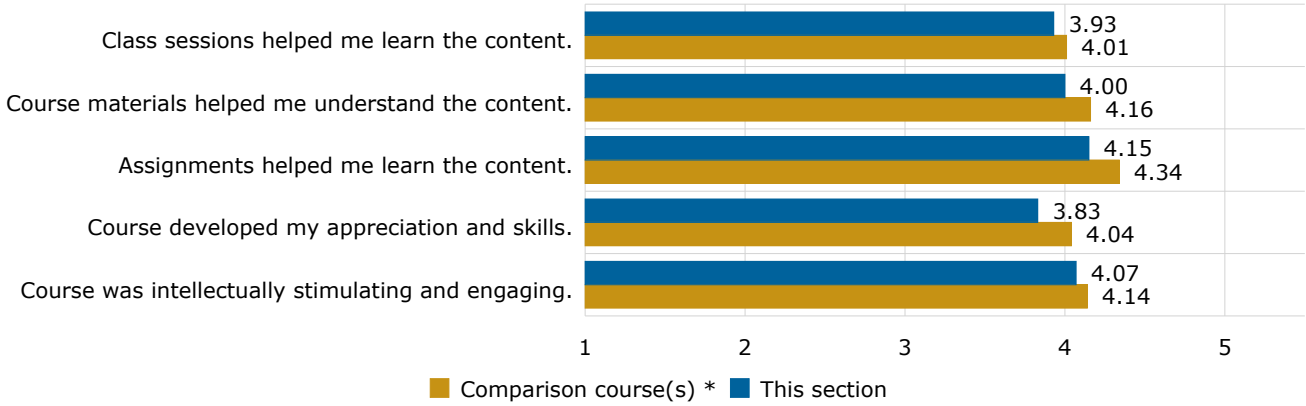

Enrollment: 54
Responses: 46 (85.19% response rate)

SUMMARY RESULTS

** Comparison courses used: All Data Science Summer Session I 2026 LD courses*

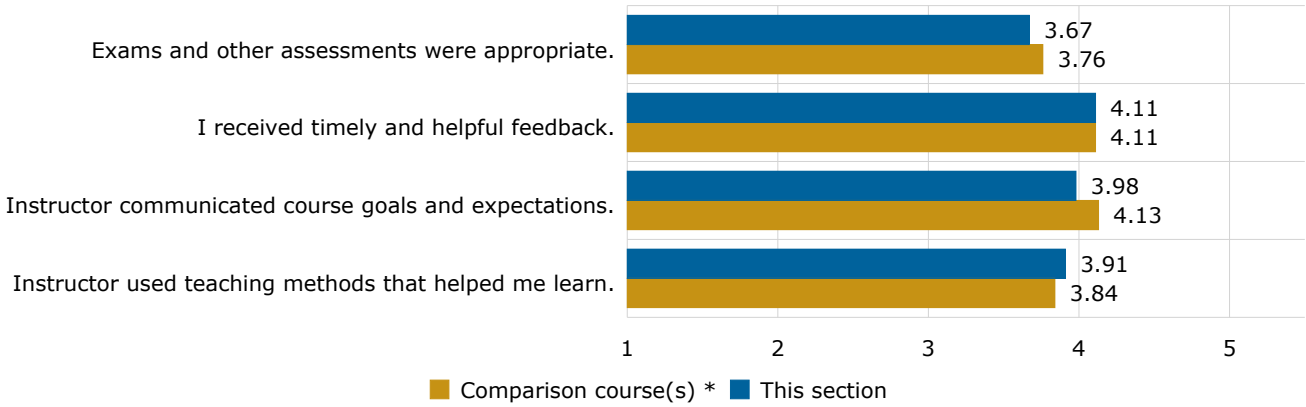

Student Learning

Class Mean: 4 (Agree) **Comparison Mean:** 4.14 (Agree)

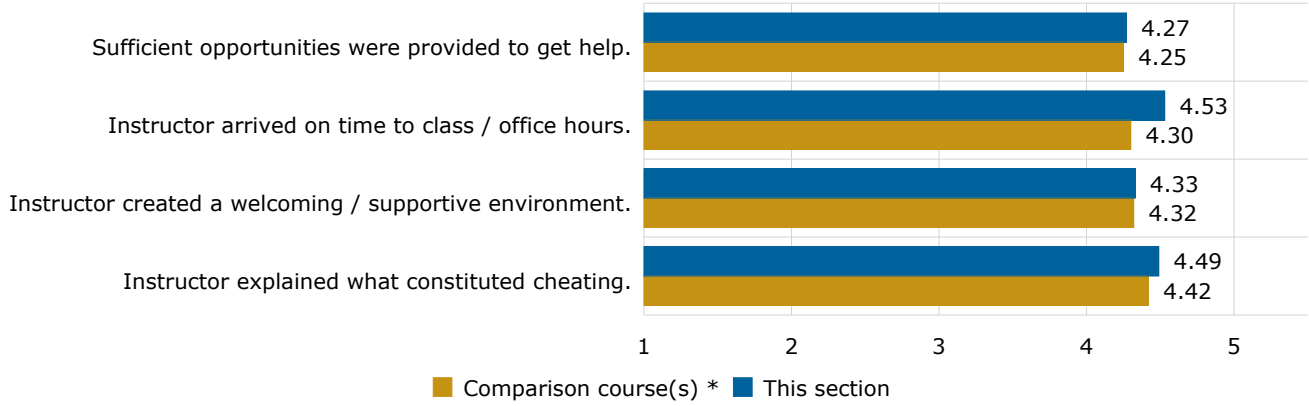

Course Structure

Class Mean: 3.92 (Agree) **Comparison Mean:** 3.96 (Agree)

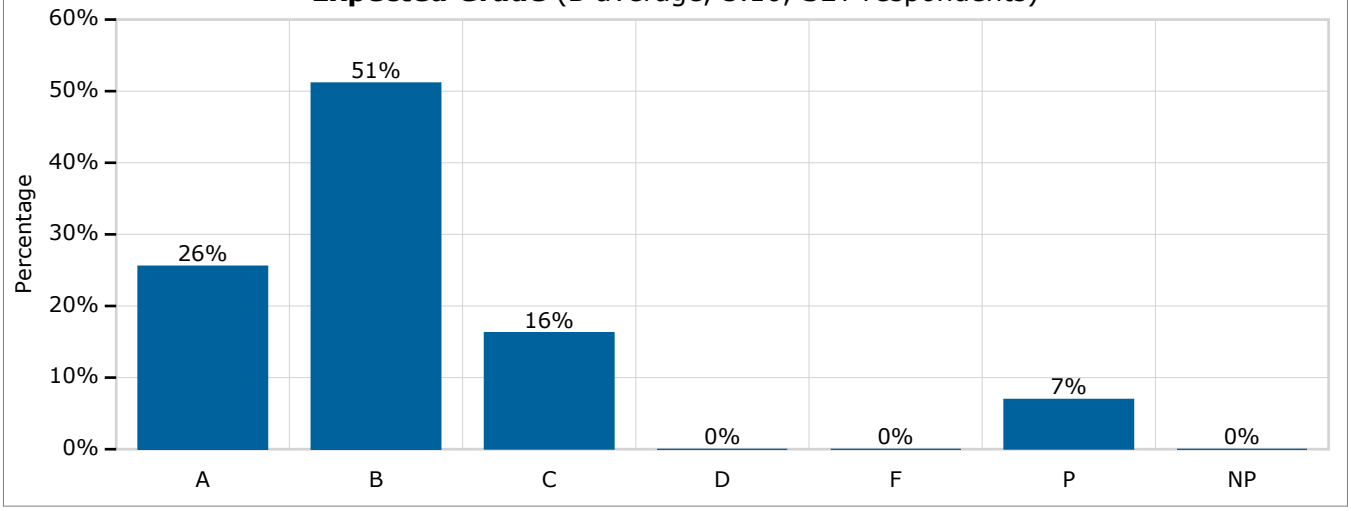

Class Environment

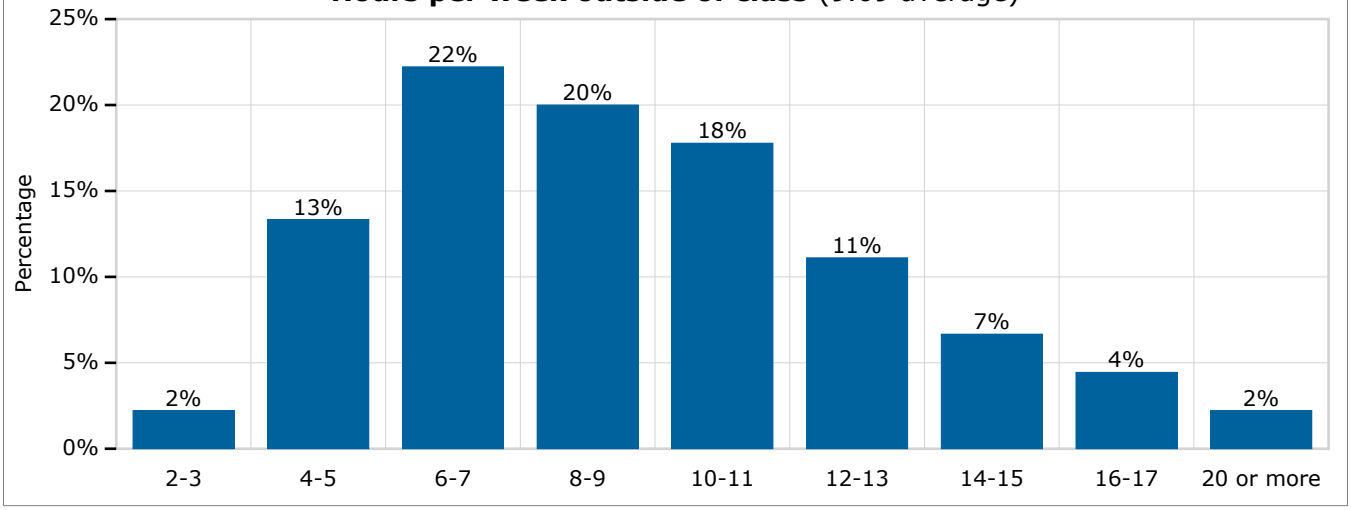

Class Mean: 4.41 (Agree) **Comparison Mean:** 4.32 (Agree)

Expected Grade (B average, 3.10, SET respondents)

Hours per week outside of class (9.69 average)

DETAILED RESULTS

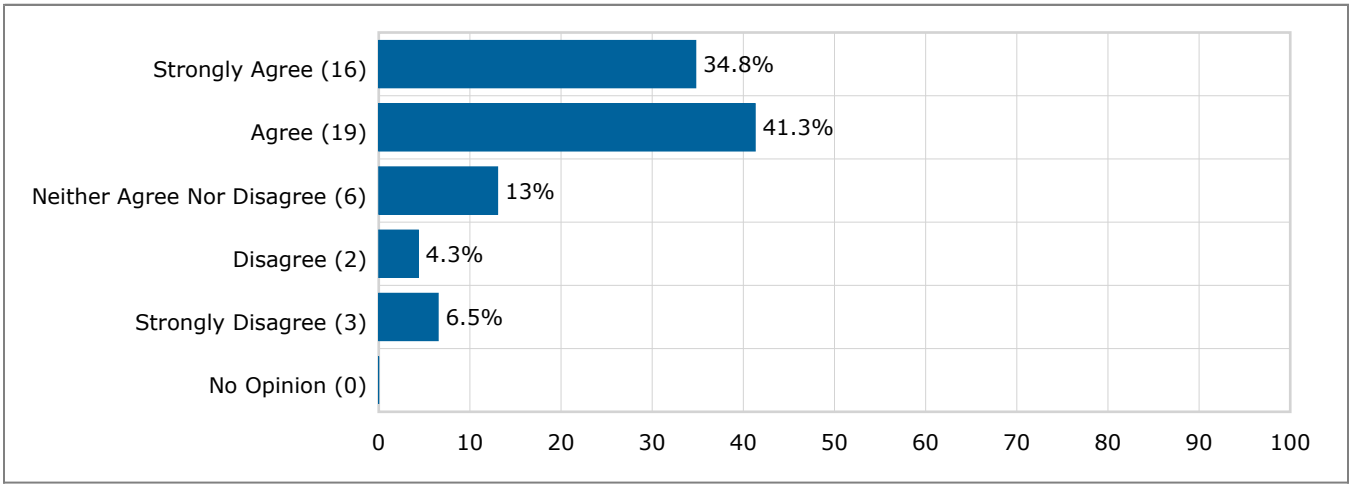

Note: "% Positive" reflects responses of Strongly Agree or Agree; "% Negative" reflects Strongly Disagree or Disagree responses.

Scoring Methodology
A numerical value is assigned to each response in the standard Likert Scale used for evaluations: Strongly Agree (5), Agree (4), Neither Agree Nor Disagree (3), Disagree (2), Strongly Disagree (1). Responses marked "No Opinion/Not Applicable" are excluded from mean calculations.

Student Learning

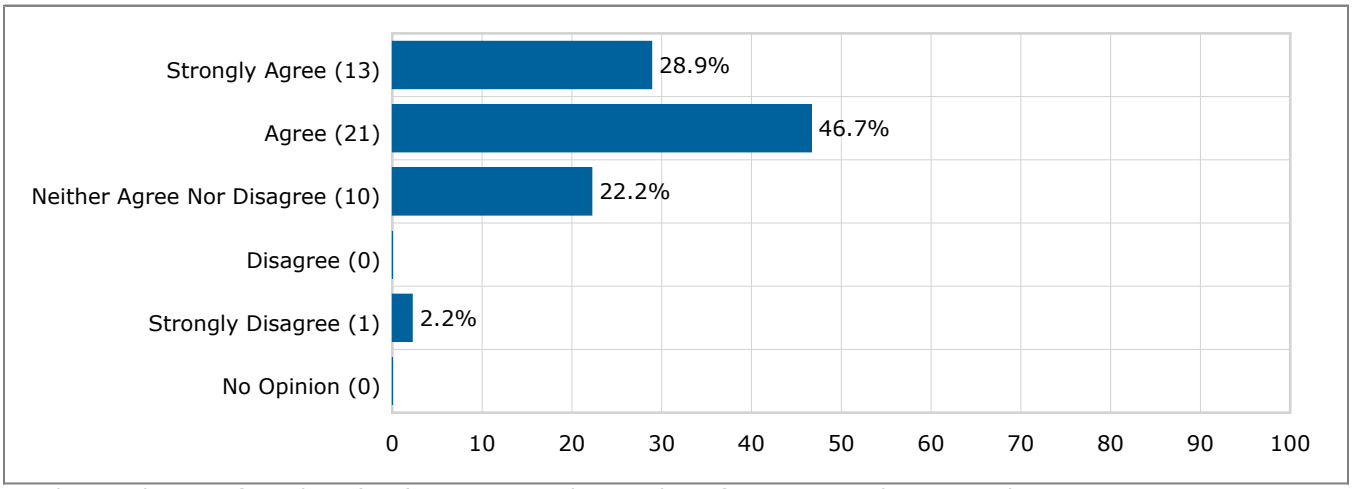

1. **Class sessions** helped me learn the course content.

% Positive/Negative	Mean (SD)	Median	Response Count
76.1% Positive 10.9% Negative	**3.93** ± 1.11 (Agree)	4 (Agree)	46 (100.00%)

2. **Course readings and other course materials** helped me learn course content.

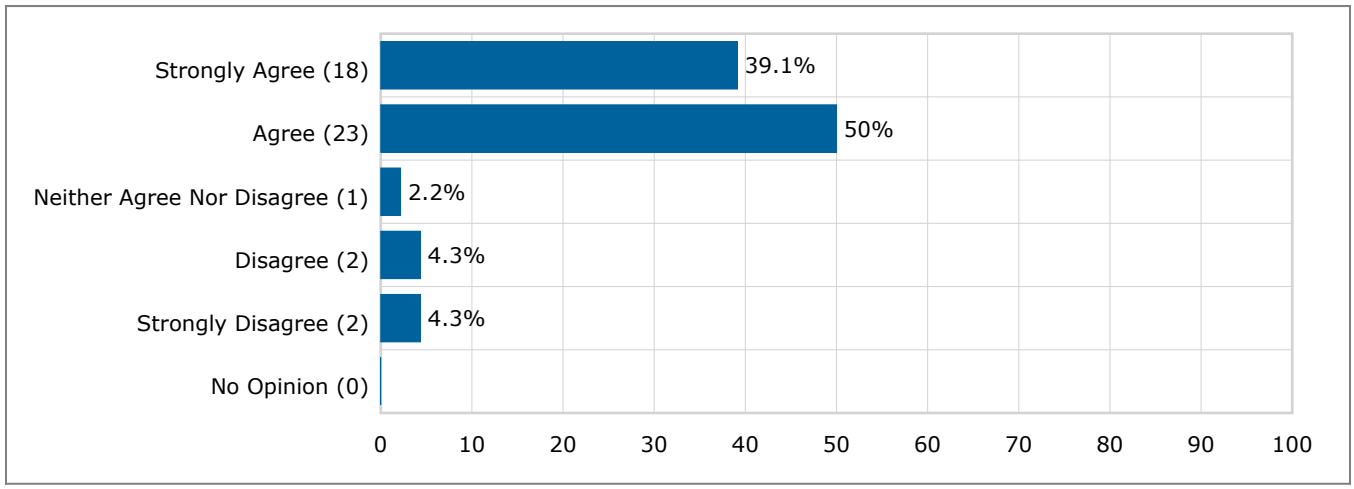

% Positive/Negative	Mean (SD)	Median	Response Count
75.6% Positive 2.2% Negative	**4** ± 0.84 (Agree)	4 (Agree)	45 (97.83%)

No Response: 1

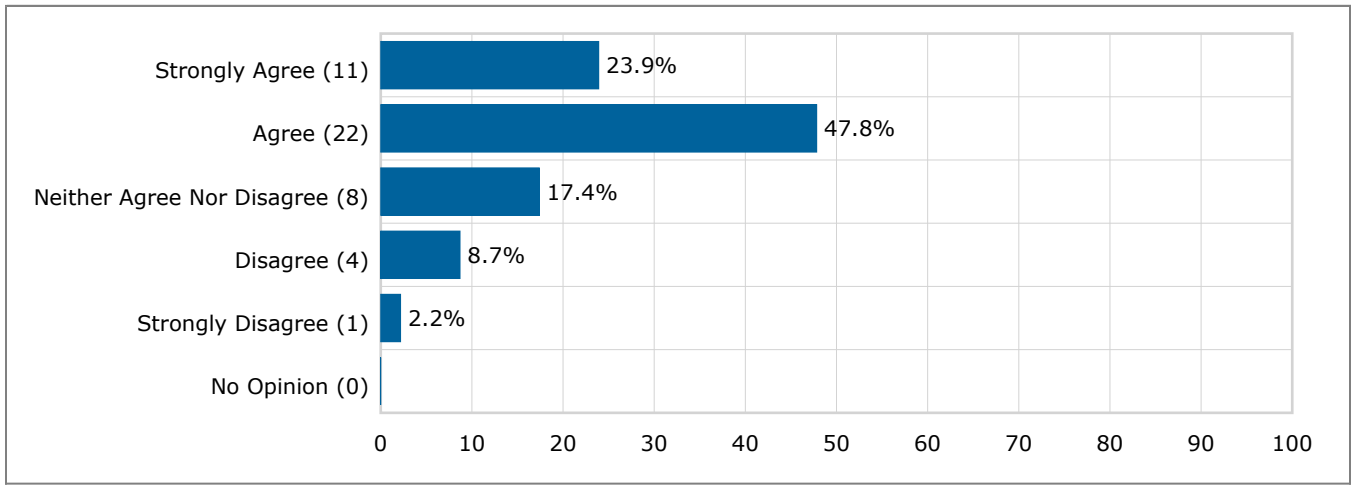

3. **Assignments** (homework, projects, etc) helped me learn the course content.

% Positive/Negative	Mean (SD)	Median	Response Count
89.1% Positive 8.7% Negative	**4.15** ± 0.98 (Agree)	4 (Agree)	46 (100.00%)

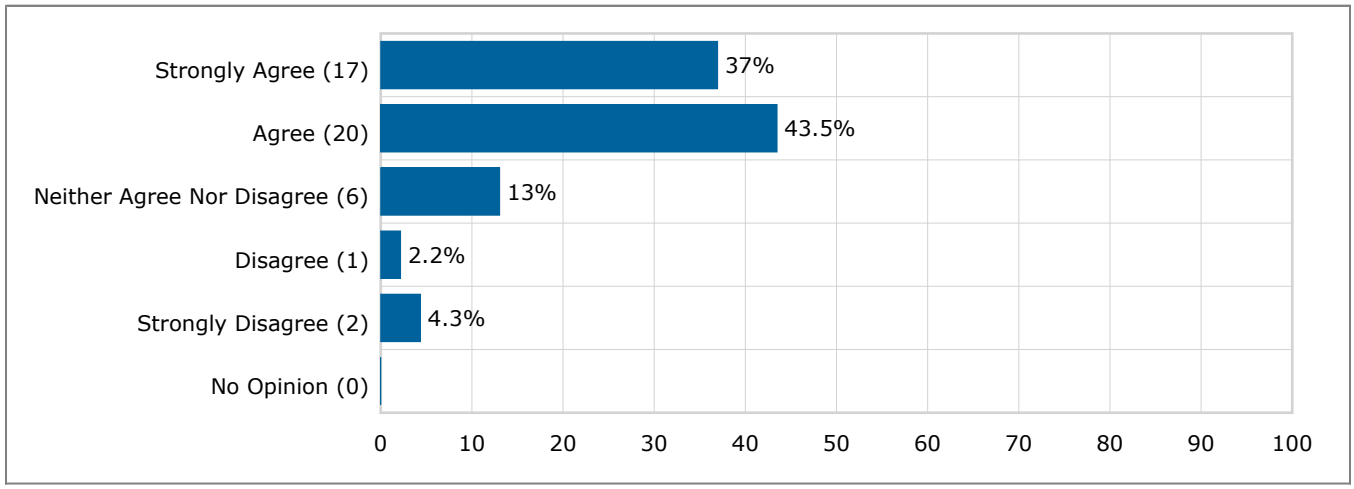

4. The course **developed** my **appreciation** of and **skills** for the subject.

% Positive/Negative	Mean (SD)	Median	Response Count
71.7% Positive 10.9% Negative	**3.83** ± 0.96 (Agree)	4 (Agree)	46 (100.00%)

5. The course was **intellectually stimulating and engaging**.

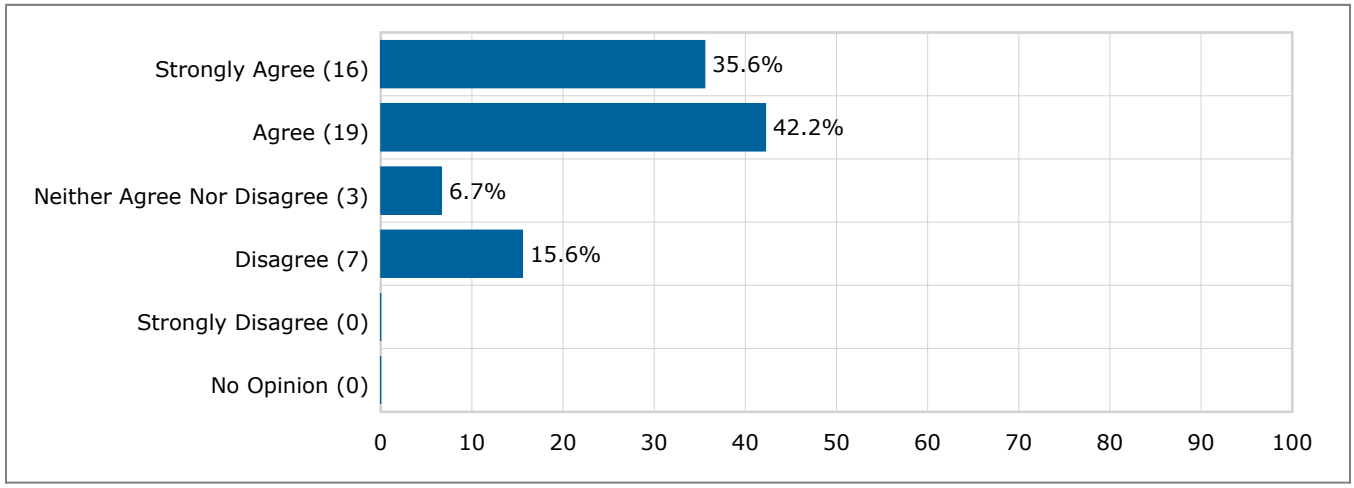

% Positive/Negative	Mean (SD)	Median	Response Count
80.4% Positive 6.5% Negative	**4.07** ± 0.99 (Agree)	4 (Agree)	46 (100.00%)

Course Structure

6. The instructor effectively communicated **course goals**, learning **outcomes**, and **expectations**.

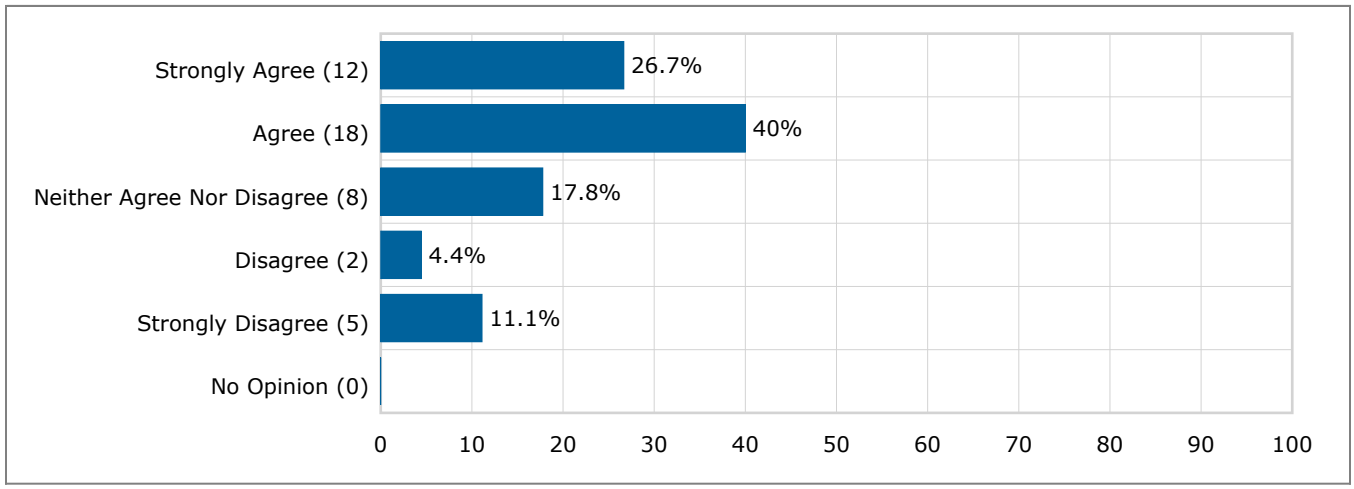

% Positive/Negative	Mean (SD)	Median	Response Count
77.8% Positive 15.6% Negative	**3.98** ± 1.02 (Agree)	4 (Agree)	45 (97.83%)

No Response: 1

7. **Exams and other assessments** (essays, projects, etc) were an appropriate measure of course learning outcomes.

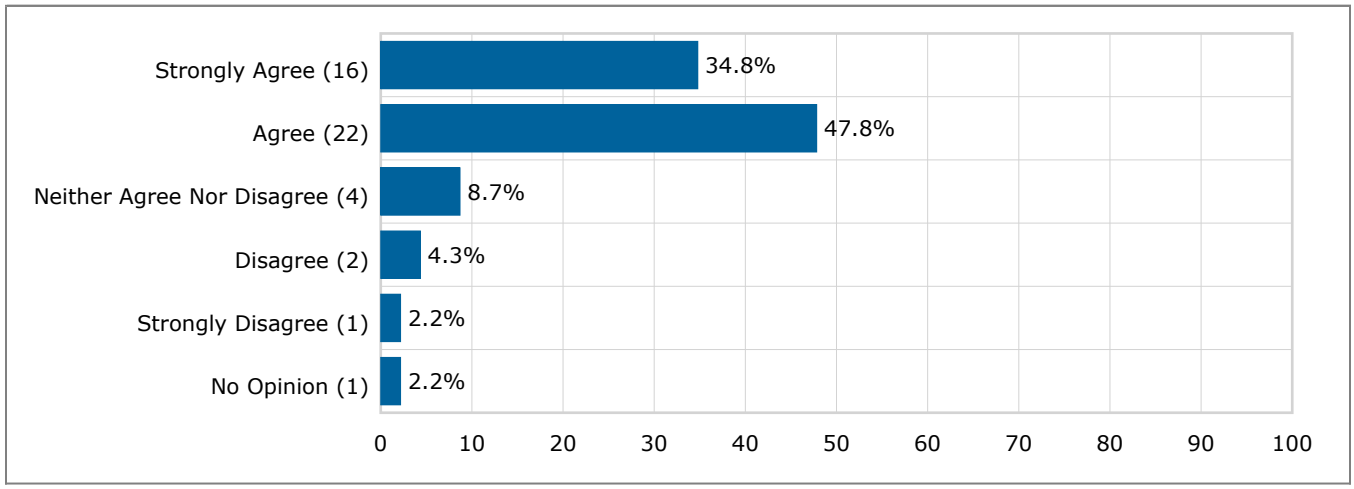

% Positive/Negative	Mean (SD)	Median	Response Count
66.7% Positive 15.6% Negative	**3.67** ± 1.23 (Agree)	4 (Agree)	45 (97.83%)

No Response: 1

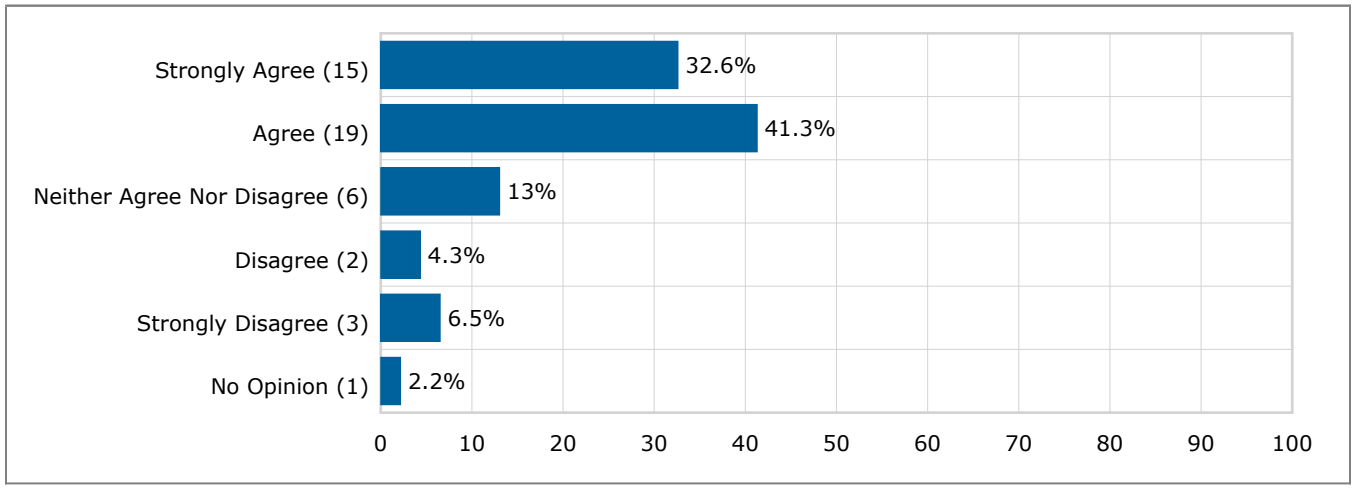

8. I received **timely and helpful feedback** in this course.

% Positive/Negative	Mean (SD)	Median	Response Count
82.6% Positive 6.5% Negative	**4.11** ± 0.90 (Agree)	4 (Agree)	46 (100.00%)

9. The instructor incorporated **teaching methods** that helped me learn.

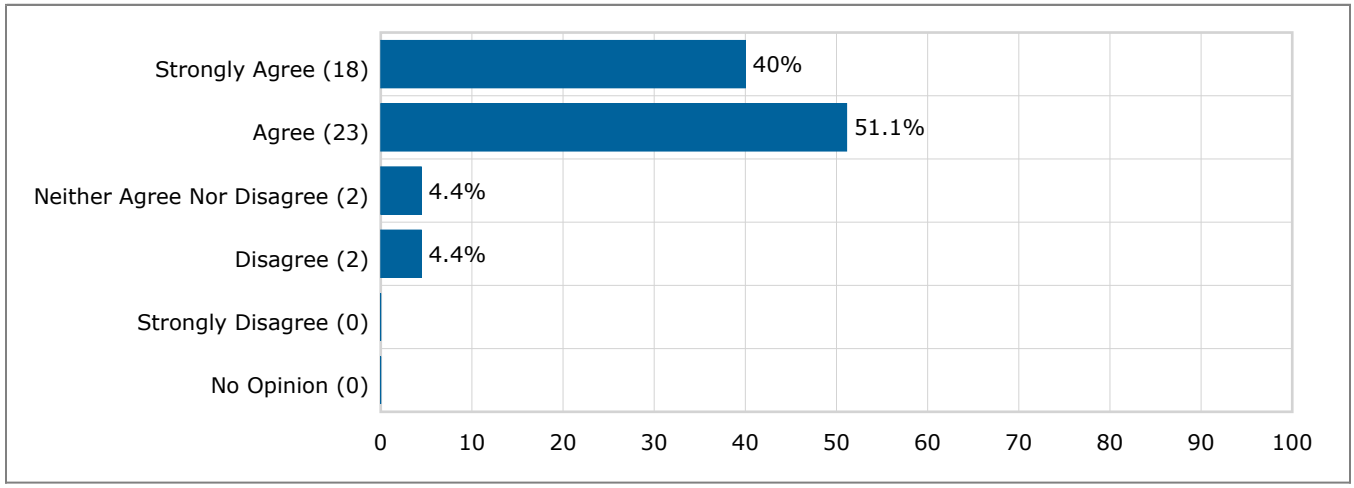

% Positive/Negative	Mean (SD)	Median	Response Count
73.9% Positive 10.9% Negative	**3.91** ± 1.11 (Agree)	4 (Agree)	46 (100.00%)

Class Environment

10. There were sufficient **opportunities offered for me to get help** when needed (e.g. established office hours, discussion section, discussion board, etc).

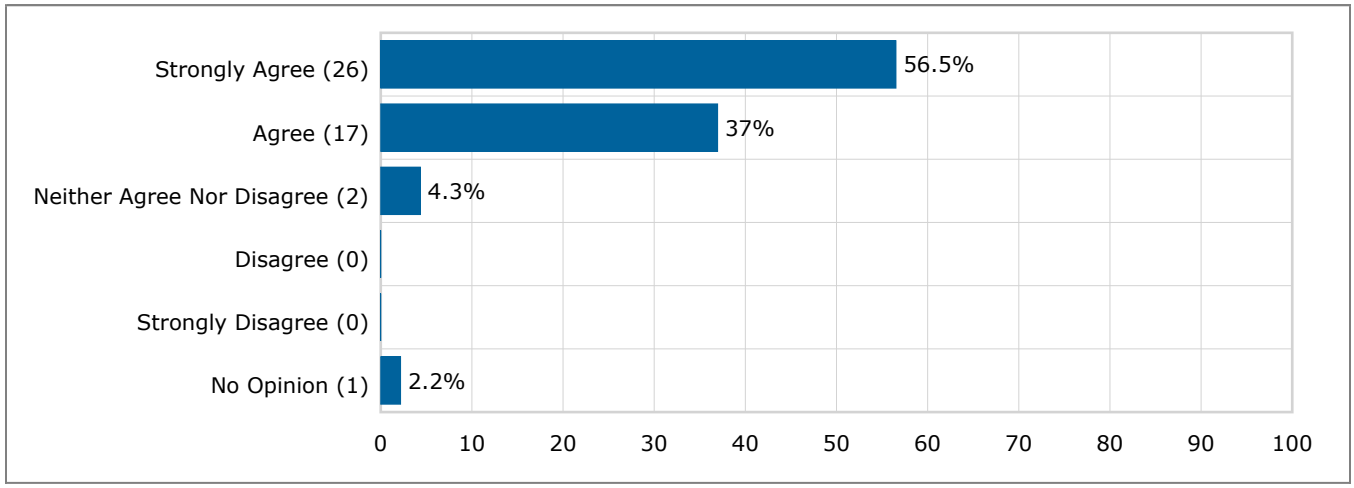

% Positive/Negative	Mean (SD)	Median	Response Count
91.1% Positive 4.4% Negative	**4.27** ± 0.74 (Agree)	4 (Agree)	45 (97.83%)

No Response: 1

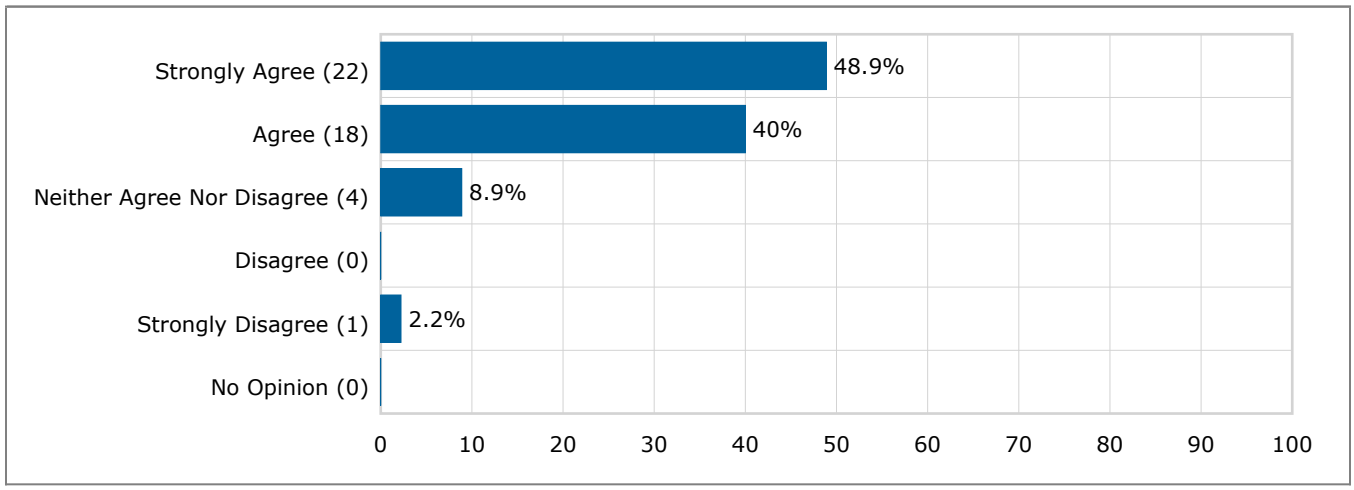

11. The instructor **arrived on time** to class sessions and office hours.

% Positive/Negative	Mean (SD)	Median	Response Count
93.5% Positive	**4.53** ± 0.58 (Strongly Agree)	5 (Strongly Agree)	46 (100.00%)

12. The instructor created a **welcoming and supportive learning environment** that valued and supported students from all backgrounds and identities.

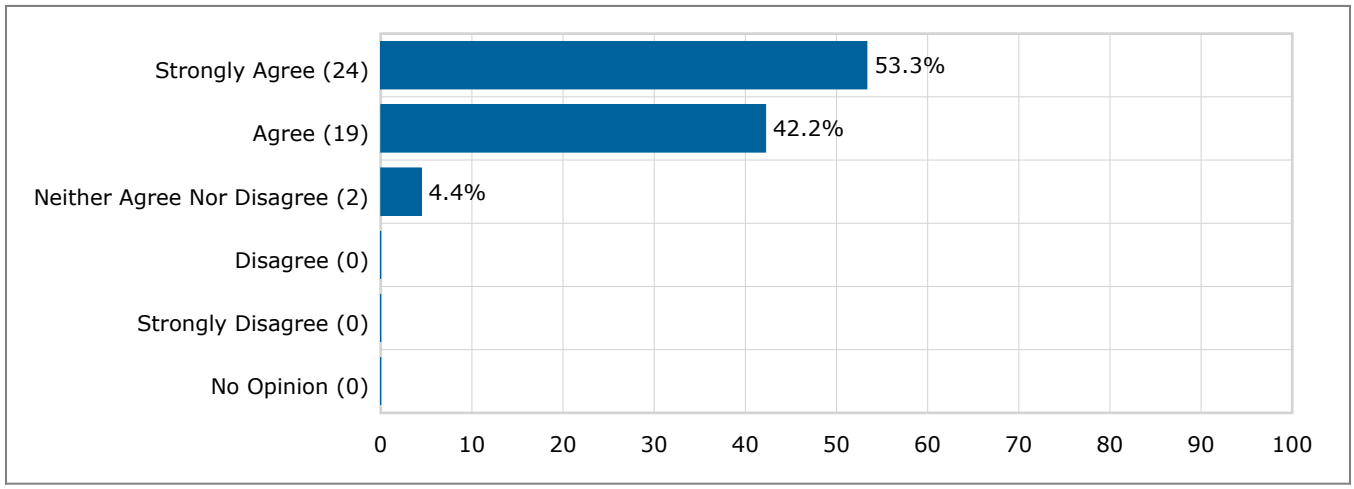

% Positive/Negative	Mean (SD)	Median	Response Count
88.9% Positive 2.2% Negative	**4.33** ± 0.82 (Agree)	4 (Agree)	45 (97.83%)

No Response: 1

13. The instructor explained what constituted cheating in this course and emphasized the importance of **academic integrity**.

% Positive/Negative	Mean (SD)	Median	Response Count
95.6% Positive	**4.49** ± 0.58 (Agree)	5 (Strongly Agree)	45 (97.83%)

No Response: 1

Please describe any specific aspects of the course and/or teaching practices that your instructor used that...

14. Please describe any specific aspects of the course and/or teaching practices that your instructor used that particularly helped you to engage with the material, learn the material, and/or develop your own critical perspectives on the material.

aa

homework allowed for a lot of critical learning

I appreciated the structure of lectures. We'd go over the definition of a concept, then use examples to reinforce these definitions, and finally review concepts later (whether it's a summary or connecting concepts together).

I liked all the example problems during lecture, and pretty much all the explanations of topic were pretty clear.

Lecture recordings, office hours, and productive and on-time lectures felt really helpful for my learning.

Lectures

Lots of resources to study

Mostly the groupwork and lectures

office hours

One teaching practice that the instructor used that helped me engage with the material was showing multiple ways to solve a problem, also example problems in which students were expected to participate and answer (once the students answered it the teacher would go over it, and help us understand if our approach was or was not right).

review sessions before exams

The course materials, slides, lectures

The homeworks helped me learn the material the best.

The homeworks were a great way to understand the material well enough to apply it.

the instructor and the TAs

This lecturer is by far the worst I've had in UCSD. Although their tests were an accurate measure of what was learned during lecturers and in class, the grading rubric was, for a lack of better words, atrocious. I got points taken away because my notation (which was accepted without issue in MATH 18, a dedicated linear algebra course, and MATH 20E, a dedicated vector calculus course, of which I got an A+ and A-, respectively) was unfamiliar to what was taught in class. Although their explanations were somewhat understandable (they said my boldface vectors looked somewhat similar to vector space sets), their explanation were either incredibly harsh, completely arbitrary (they justified their grading by saying that it looked like standard number sets when I had used none of the letters associated with them), and mathematically unjust (rigorous mathematical proofs should not depend on notation, especially for a commonly used vector notation).

Used drawings to teach concepts, and worked through problems at an understandable pace.

15. Please describe any specific aspects of the course and/or teaching practices that your instructor used that were less helpful for your learning. Optionally you may offer constructive suggestions that might improve their effectiveness.

a

Discussions at first

Groupworks felt relatively easier than exams/homeworks, so although they didn't feel that helpful, it was still good practice.

Groupworks, instructors' feedbacks

Homework could be more direct

I think groupwork assignments felt unnecessary, took up extra time. I think instead of that we could have another weekly 30 minute discussion just to go over a few problems (not cover material). I also thinks the slides had a lot of fluff and could be concise, material was generally easy to understand but concepts applied to problems were much harder then expected.

The groupwork, although helpful to learn from others, wasn't as difficult as the homework or exams so it didn't feel as helpful.

The homework when it was proof heavy

The lectures

the length of lectures tired me out

The length of the homework was less helpful for my learning. Caused a lot of tediousness and ended up being less helpful because I was rushing to get it done with towards the ends.

16. Please describe any specific aspects of the course and/or teaching practices that your instructor used that created or interfered with a welcoming learning environment that valued and supported students from all backgrounds and identities.

a

Always encourages questions in a good way

Nonw

Office hours helped me feel so welcomed and gave me the chance to talk to my teacher outside of lecture questions. I felt supported throughout the whole 5 weeks of taking this class.

professors attitude helped

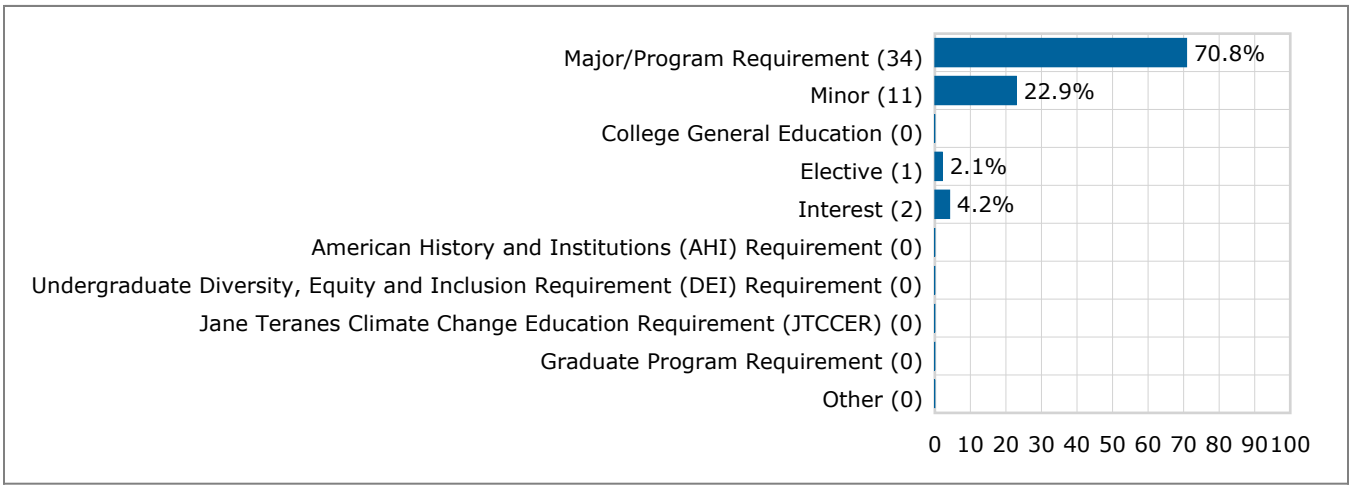

The instructor and the TA

the instructor and the TAs created a welcoming learning environment

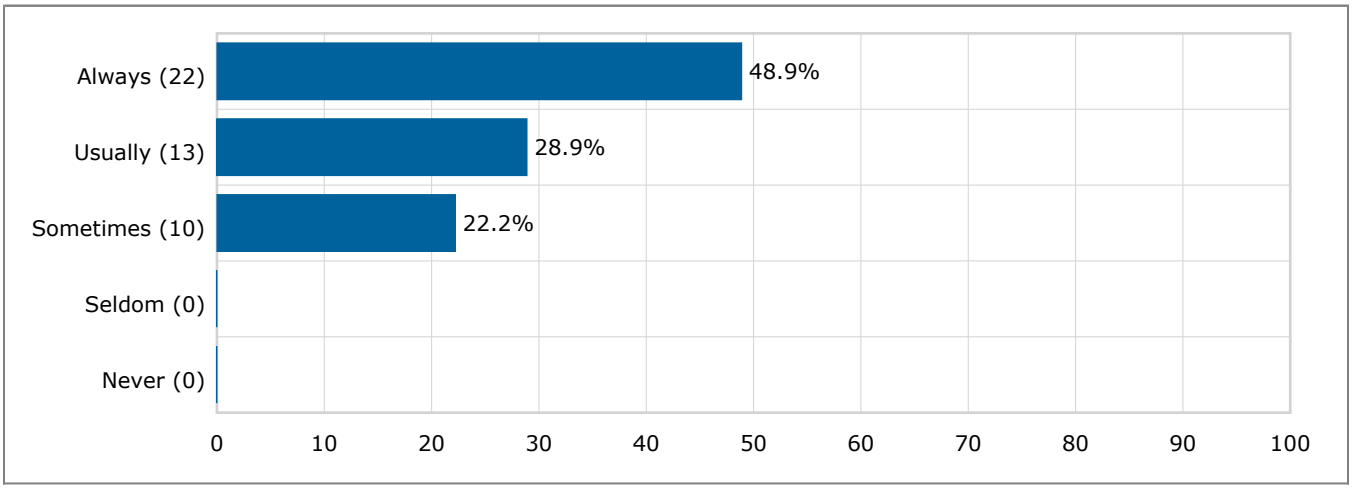

Was very nice.

Student Participation

17. What was/were your reason(s) for taking this course?

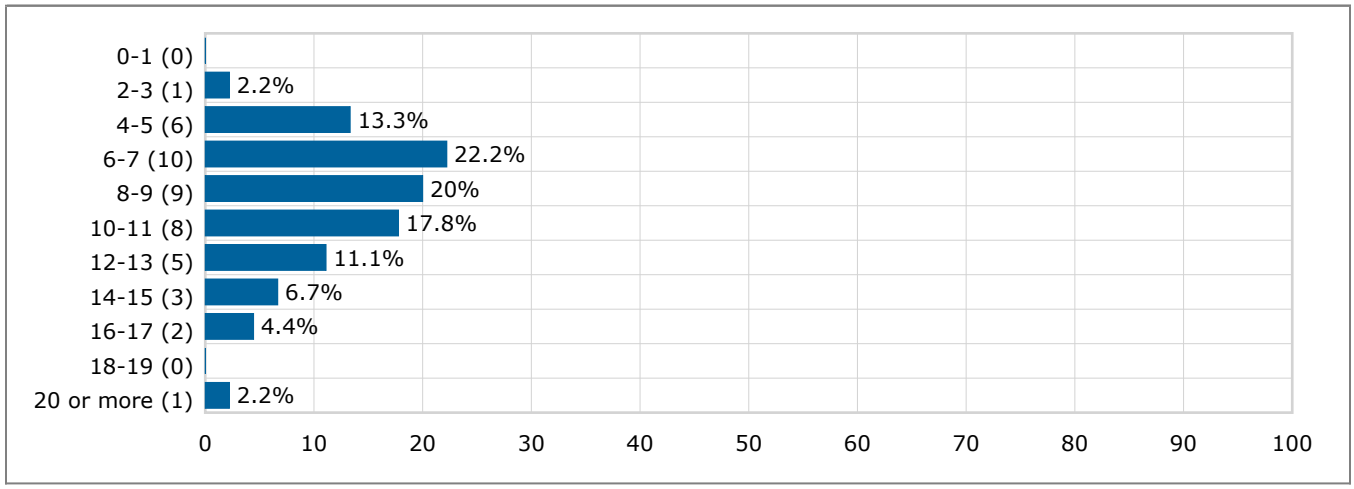

18. How often did you attend class and/or engage with course materials?

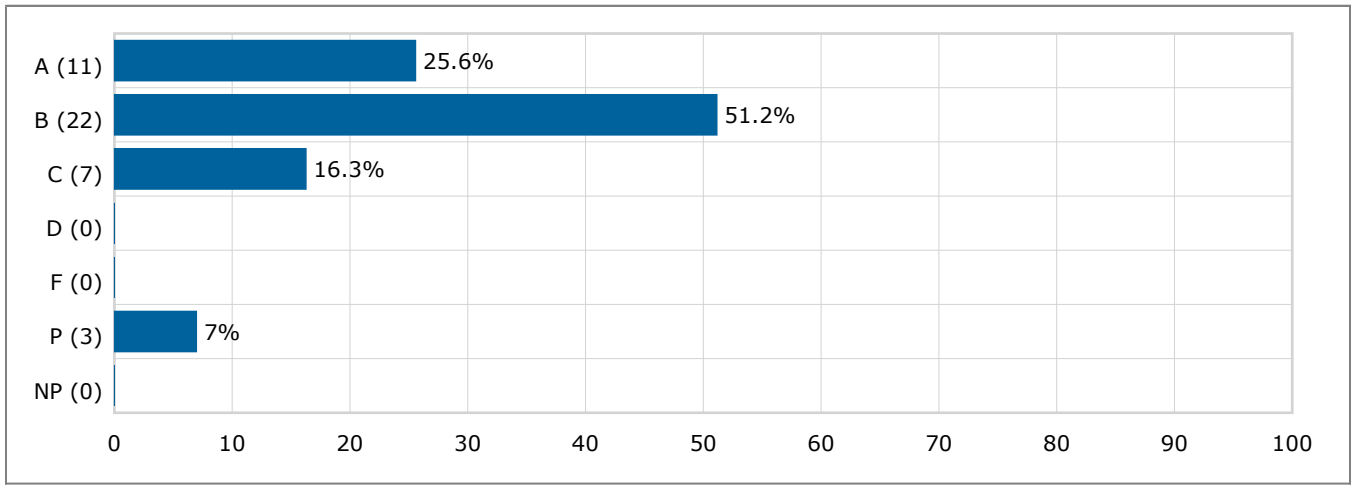

No Response: 1

19. Hours per week of work outside of class

No Response: 1

20. Expected grade in the course

No Response: 3

Additional Feedback

21. Is there anything else you would like to share about your experience in the course?

5 weeks is so fast

a

I enjoyed this class a lot. Although it was challenging, I learned a LOT!

I think this class was a lot of material to learn in 5 weeks, which really can't be helped, since it's a summer course, but I do wish the exam policies had taken that extra difficulty into consideration. Maybe if this was the only summer course I was taking, I would've and enough time to practice and study enough to feel confident with the material, but unfortunately that was not the case.

Noooo

The grading often felt inconsistent and unnecessarily harsh. There were multiple homework problems where points were deducted because of a lack of explanation or presentation, even though the instructions did not explicitly require those things. If you expect students to justify every step or provide detailed reasoning, that expectation should be clearly stated in the assignment. It is frustrating to lose points for requirements that were never communicated.

The homework schedule was also extremely demanding. In many weeks, we had a lecture in the morning, the homework was released that afternoon, and it was due the following night. For a mathematically intensive course with proof-based questions, this is simply not enough time for students to fully understand the material, ask questions, and complete the assignment carefully. Most upper-division STEM courses typically provide at least several days for homework, especially when the problems require substantial reasoning.

The pace of the course was another major issue. Covering such a large amount of theoretical material in a five-week summer session was already difficult, but the workload and deadlines made it feel overwhelming. Many students were spending more time trying to keep up with deadlines than actually learning the concepts.

Finally, the exams felt rushed. There were many questions relative to the time provided, making the exams feel more like a race against the clock than an assessment of understanding. Some students may know the material well but still struggle to finish due to time pressure.

The instructors are amazing, but the course is poorly designed for a summer session course. It doesn't accommodate the fact that learning things in 2 weeks is different than doing so in 1 week, and the amount and depth of homework is challenging

The data and comments provided in this report are unfiltered and unedited, and do not necessarily reflect the opinions of instructors, the teaching department, Academic Affairs, or UC San Diego. Responses and comments are made available without auditing or editing, and they may not be modified or deleted, to ensure that each evaluator has an opportunity to express their opinion.
